

CP-4

4 HEAD FILLER | SEAMER

Quality in All Conditions

20-30

Cans Per Minute

55" x 27"

Operating Footprint

Single

Operator

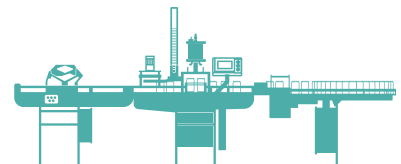

Integrated

Tank Control

Versatile: Counterpressure technology is able to fill cans with any type of beverage, from still products up to the most carbonated beverages in your line.

Hassle-free: An intuitive, user-friendly interface removes the complications from the counterpressure machine experience.

Fully automated: Filling 20-30 cans per minute of any beverage type and nearly any can size is possible with this system that delivers consistent, high-quality fills.

Build a complete line with ACM.

RT-212 Infeed Table

Offering expanded accumulation, pre-rinse, and an integrated mount for date coders.

PTA Can Handle Applicator

Reduce the number of operators needed by automatically applying PakTech® brand handles.
